

Cells Study Guide

Cells Study Guide - The Cell. The cell is possibly the most important concept in biology since it is the basic unit of life. Every living organism is made up of cells (or just one in the case of bacteria). Your body is composed of microscopic cells that are only visible if viewed under a microscope. Science - Cells - Study Guide. particles move from an area where there are a lot of the substance to an area where there are few particles. Study Guide Questions Be able to describe characteristics that are shared by ALL CELLS. (In other words, what is The Cell Theory?) Compare and contrast prokaryotes and eukaryotes. Compare and contrast plant cells, fungal cells and animal cells. Label the cell parts shown on this animal cell. ...Use our cell biology study guide course to catch up in class or prepare for an upcoming test. These fun text and video lessons outline all the subjects you're learning, but you can work through them at your own pace to master the ones that are challenging you the most. 15 chapters in Cell Biology Study Guide.
